### **Himalayan Vision 2030**

The predictions made by Prof. Harar, Israel in 1970, Sri Ram Chandra Sharma and Swami Vivekananda are summarised here.

God's will appears to be that the entire Himalaya would be developed as green, flowery, herbal and world famous tourist resort. (Here special benefit is the vast and natural life support system consisting of: oxygenation, rejuvenation, solitude, trekking, adventure, sports, vision of spectacular scenery of infinite scale in summer and winter in the upper Himalaya; fresh air, water and fruits, medicinal water of Ganga river, abundant medicinal herbs; freedom from noise, pollution and daily cheating, etc.). Migration is expected from aging mega-cities to small towns and safe Himalaya. So multi-national companies may build their holiday homes, airports and villages. In most places of Himalaya, an organised religious society would develop world famous universities, and hygienic villages probably after devastating destruction due to the third world war / world wide civil wars. Godly love would be reborn in Himalaya due to concentration of Saints and God of Love may tame Money - God after this war. Then joy and courage would flow freely from one heart to other heart for a thousand years from the Himalaya to the whole world nourishing cultures and global peace.

This need would motivate minds of researchers in Geology, Rock Mechanics, Hill Engineering, Hygienic Technology, Hill Ecology, etc. to make original and vital contributions. Thus, our future is in the Himalaya and such other untapped mountain ranges.

{Godly Bliss can be found only within and no where else}
